New Game

Select this option from the title screen to start a new game. Then select which diary slot you'd like to save the story of your adventures in.

Choose Your Gender

Select this option to choose a saved game to keep playing.

YO-KAI WATCH 2 Link

By linking to a different version of the YO-KAI WATCH 2 game, you'll be able to take on a special dungeon.

To be able to link, you'll first have to progress your story until you are able to travel to San Fantastico.

Link Alone

To play a linked version of YO-KAI WATCH 2, first launch the version of the game you wish to link, select Link Alone, and save linking data.

Next launch the version of the game you wish to play, and then go speak to Mister E at the abandoned house in San Fantastico. You will be granted a key to the special dungeon.

◆ **Make sure to obtain the key within two hours of saving linking data**, otherwise the above steps will have to be repeated from the beginning.

Link with Someone (Local Play)

You can also link versions with another player who has a different version of YO-KAI WATCH 2.

● You Will Need

- One Nintendo 3DS system per player (up to two)
- One YO-KAI WATCH 2: Fleshy Souls game
- One YO-KAI WATCH 2: Bony Spirits game

● Instructions

Open the Link with Someone menu in each version of YO-KAI WATCH 2. To begin, one player selects Send PIN and the other player selects Receive PIN.

A PIN will appear on the screen of the sender. When the recipient enters the PIN on their screen, linking is complete.

Each player can then talk to Mister E at the abandoned house in San Fantastico to receive the key to the special dungeon.

- ◆ **Please note that if you turn off the power or quit after linking, you won't get the key. If this happens, you will need to follow**

the linking procedure again from the beginning.

Collecting Special Yo-kai

Try playing the game using an SD Card that contains saved Yo-kai Cam

photos taken within the last two hours via the previous title, Yo-kai Watch, and go talk to Mister E near Mt. Wildwood Shrine. He'll give you a Select-A-Coin + that can be used in the Crank-a-kai to get a special Yo-kai.

6

Quitting the Game

When quitting the game, be sure to save your progress. Press **START** and select Back to Title to return to the title screen.

 Saving Progress

To save your progress, select Diary (page 14) on the Yo-kai Pad menu or visit Eyepo, who can be found at Everymarts and some other locations.

- ◆ In some situations, such as when a Yo-kai icon (page 9) appears, you may be unable to save to your diary.

Data can be lost due to user action, such as repeatedly powering off and on the system or removing a Game Card or SD Card while saving. Data loss may also be caused by poor connectivity

due to dirt or dust in the system's ports. Please be aware that in these cases data cannot be restored.

Before doing so, please check that you have enough space in your surrounding area, and be sure to hold the system firmly in both hands. Please do not move the system about too wildly, as this may lead to injury.

8

How to Play

Explore Springdale and nearby areas, and talk to the people you find there. When you get in a battle, help your Yo-kai friends defeat the enemy.

Making Yo-kai Friends

Certain enemy Yo-kai you defeat in battle will want to become your friends. When you

become friends with Yo-kai, you can give them a nickname.

- ◆ There are some Yo-kai you cannot befriend.
- ◆ You can also befriend Yo-kai via events, quests, the Crank-a-kai (page 25), and the Oni Crank-a-kai (page 12).

Quests

If you talk to someone with a  or  mark above their head, they'll

ask you to
complete a quest (page 14).
Completing quests will reward you
with money, items, and experience
points.

1 Yo-kai Watch (Yo-kai Radar / watch)

You can switch freely between these two functions.

As you approach a hidden Yo-kai, the needle on the Yo-kai Radar will move to the right. You'll find the Yo-kai hidden near the spot where the needle enters the red and the radar starts blinking. Letters like E and D indicate the Yo-kai's rank. A purple ? means it may not be a Yo-kai at all.

You can check the in-game time on the watch. Daytime is on the right and nighttime is on the left. The needle makes one full cycle per day.

Enemy

If an enemy touches you, you'll enter a battle (page 18). Sometimes Yo-kai will just want to talk instead.

Current objective

This will display automatically if you stand still for a moment.

Various icons are displayed on the map.

Moving

Slide  in the direction you would like to move your character. Move  slightly to walk.

You can also touch the Touch Screen and slide the stylus in the direction you want to move.

Riding Your Bike

Once you get a bike, you can press  to get on it. (There are parts of the map where you cannot ride a bike.)

Dash / Standing Pedal

Move **○** while holding **Ⓑ** to dash or to pedal standing up on your bike. You can also dash by making a long slide on the Touch Screen, all the way to the edge.

Stamina Gauge

Dashing or standing up to pedal drains your stamina gauge. If it empties all the way, you will be unable to dash or pedal standing up until it refills, and your movement will be slowed while you're recovering.

Check/Talk

Sometimes an icon like , , , or  will appear. Press **Ⓐ** while in those places to investigate that location or talk to people, Yo-kai, and animals.

If you check places where  appears, the Yo-kai Watch will enter Watch Mode and you'll be able to check the area more closely.

Open Treasure Chests

Move close to a treasure chest and then press **(A)** to get the item inside. Treasure chests come in two different types.

These will reappear after some time.

These can be opened only once.

11 Actions (2)

Using the Yo-kai Lens

If the Yo-kai Radar starts reacting to something, press  to use the Yo-kai Lens and take a closer look. You may even find a Yo-kai!

If the radar turns purple and a ? is displayed, press  to examine the area. If the radar turns red and shows a letter like E or D, look for a spot where the  icon appears and check it out by switching to Watch Mode.

Baffle Boards

These signs are hidden around town and have Yo-kai-related puzzles on them for you to solve. You can find them using the Yo-kai Lens. Answer the question with the correct Yo-kai name to make a Yo-kai Hot Spot appear. If you put that Yo-kai on the hot spot, something will happen...

Gates of Whimsy

These mysterious doors are connected to a special map in a different

dimension. As you progress through the story, you'll be able to find them using the Yo-kai Lens. Once inside, you'll be given challenges to complete for special items called Gate Globes.

If you are defeated while inside a Gate of Whimsy, you'll be returned to your bedroom.

Watch Mode

When you use the Yo-kai Lens to check spots where the  icon appears, you'll go into Watch Mode. In Watch Mode, you'll be able to look more closely by moving the lens with  or the stylus.

Looking for Yo-kai and Hidden Things

When you find a hidden Yo-kai or object, fill up the Discovery Meter by keeping your lens focused on it. If you can keep the lens on it until the meter is completely filled, the Yo-kai or object will be fully revealed!

Discovery Meter

Catching Bugs

Focus the lens on a bug, and then press **(A)** or tap the Touch Screen. Press **(A)** again to stop the spinner. If it stops on one of the solid bars, the bug will be yours!

Use Black Syrup with **(Y)** to increase the number of solid bars on the wheel, making the bug easier to catch.

- ◆ You need your Bug Net to catch bugs.

Catching Fish

Focus the lens on a fish, and then press **A** or tap the Touch Screen.

Slide the reel on the Touch Screen clockwise to keep the gauge on the top screen within the blue marks. If

you don't turn it enough or you turn it too much, the gauge will turn red and the fish will get away!

When "Spin that reel!" appears on the screen, quickly slide the stylus in a circle to reel in the fish. Fill the gauge, and the fish will be yours!

Use Fish Bait with **Y** to increase the number of fish you can see in the water.

◆ You need a Fishing Rod to catch fish.

12 Terror Time

When you're out and about, sometimes you'll see a countdown clock begin out of nowhere. When you see that timer, get ready! When it reaches zero, you'll enter...Terror Time!

Entering Terror Time

Once Terror Time starts, the actions you're able to take on the field are restricted and an

Oni and his underlings will appear. If one of the Oni's underlings spots you, they will call to him and he will start chasing you. If the Oni catches you, you'll fail to escape. Try to collect as many Oni Orbs as you can and escape within the time limit!

- ◆ There are certain things you can't do while in Terror Time. For example, you can't use the Yo-kai Pad or Yo-kai Lens.

Tools and Oni Orbs

During Terror Time, you can find Oni Orbs and various other items that can only be used

while you're in Terror Time. Oni Orbs are kept until you escape, and they are used on the Oni Crank-a-kai.

Items can be used at any time by pressing \odot , but you can only hold one at a time. If you pick up another item while already holding one, the old one will be thrown away.

Escaping Terror Time

The exit from Terror Time is a golden sliding door, which will appear sometime

after Terror Time has begun. You will escape if you manage to use the sliding door within the time limit. If you are caught by the Oni or if time runs out, you'll fail to escape.

Oni Crank-a-kai

If you manage to escape, you'll get a turn on the Oni Crank-a-kai. The power of the Oni Orbs you've collected will flow into a coin that you can trade for a capsule. The more Oni Orbs you collected, the better the chances of getting a good item or Yo-kai, so make sure to collect as many as you can!

13 Yo-kai Pad Menu

Press ⊗ or touch  while in the field to open the Yo-kai Pad menu.

Yo-kai friends

Check simplified statuses of the Yo-kai set to your Yo-kai Wheel (page 18).

Yo-kai will level up after gaining a certain number of experience points. Stats like Strength and Spirit will increase as a Yo-kai levels up.

If You Lose

If all of your Yo-kai friends on the Yo-kai Wheel faint, you lose the battle. If you lose, you'll be returned to a nearby location.

While you're in battle, you can give your Yo-kai friends commands using the Touch Screen. Once you have progressed past a certain point in the game, Model Zero commands will also become available.

Command: Soultimate

This allows you to use a Yo-kai's Soultimate Move. Select a Yo-kai with a full Soul Meter, and follow the instructions on the Touch Screen. Once the gauge is full, your Yo-kai will unleash a Soultimate Move.

Model Zero Command: M Skill

When the Yo-kai Watch is in Model Zero mode, the Soultimate command changes to the M Skill command (M for Moximous). M Skills are stronger than normal Soultimate Moves, but they consume three Soul Meters! The Soul Meters of the Yo-kai using the move and both the Yo-kai on either side of it will all be used up, so use M Skills wisely.

Command: Purify

Yo-kai Inspired by enemies will suffer all sorts of bad effects. To restore them, move the Inspired Yo-kai to the back and use Purify. Follow the instructions on the Touch Screen to successfully remove the bad effects from the Yo-kai.

Command: Target

This allows you to put a pin on the enemy you want to focus attacks on. Move the Yo-kai Lens and line it up with an enemy Yo-kai, and then press (A) or tap the Touch Screen to put a pin on the enemy. Bosses may have different parts of their body that you can target with a pin, so be on the lookout!

Removing Pins

Select Remove Pin to remove a pin, or move the lens to a place without an enemy Yo-kai and tap the Touch Screen.

Wisps

If you see a glowing orb during battle, you should try to pin it! This

is a Wisp, and when it's broken, it can fill a Yo-kai's Soul Meter, give out items, and more. Wisps won't stick around forever, so make sure to pin them when they show up!

Model Zero Command: Poke

When the Yo-kai Watch is in Model Zero mode, the Target command changes to the Poke command. Select an enemy as you would with the Target option, and repeatedly poke the enemy. Successfully fill the gauge to get bonuses like making the enemy easier to befriend, draining their Soul Meter, or gaining extra money. The enemy must be Loafing or Inspired before they can be poked.

Command: Item

This command lets you use items. To use an item on an ally, tap the item, tap Use on Friend, and then tap the target. To use on an enemy, tap the item and then tap Use on Foe.

Making Friends of Enemies

If you give enemy Yo-kai food, there will be a better chance of them joining you after the battle. If you give them their favorite food, your chances will be even better! The chances of them befriending you are different for each food type, regardless of whether that type is the Yo-kai's favorite.

If you slide the Yo-kai Wheel to turn it, you can rotate Yo-kai between the back and front lines.

How to Play

Like in Terror Time, the goal of Yo-kai Watch Blasters is to collect Oni Orbs and, after it has appeared, reach the goal. In Blasters, however, the Oni can be defeated, and each player plays as a Yo-kai chosen from one of four different roles—Fighter, Tank, Healer, or Ranged. Each Yo-kai has different moves depending on its role, and the moves can be triggered with Ⓐ/ⓧ. There are also helpful items scattered around. Pick them up, and then use them with Ⓨ. (Like in Terror Time, you can only hold one item at a time.)

When the exit appears, escape within the time limit to win. When players successfully escape, their Oni Orbs are pooled together to infuse a coin that lets you turn the Oni Crank-a-kai.

- ◆ Players who don't successfully escape only have half their Oni Orbs counted.
- ◆ There is no COM player, even when fewer than four players are taking part.
